

## **Mrs Mac's Meat Procurement Policy**

Mrs Mac's is a proudly Australian owned and operated company. Wherever possible we source all raw materials from Australia to support local growers and processors.

We currently purchase 14T of beef from local Western Australian growers, delivered fresh to our bakery daily. We have worked with our meat supply partners over many years, ensuring that quality is maintained to our rigorous standards. We have strict specifications covering quality, microbiological safety, as well as integrity of the supply chain.

We can assure you that this policy is firm and we have no intention of purchasing any meats from overseas sources.

Mrs Mac's labeling is all moving towards the statement 'Made in Australia from local and imported ingredients'. It is our understanding that if any ingredient is sourced from overseas this is the correct Country of Origin claim. In our case a number of minor ingredients and in some cases packaging materials are sourced from overseas where an equivalent product is not available here.

If consumers have any concerns over individual ingredients they are welcome to contact us at Head Office and we will provide all the detail they require.
